15. (Once Amended) A device for locating an item packaged
in a container among potentially obscuring protective material,
said device comprises:
an elongated flexible tether extractably loaded upon a
dispenser anchorable to said container;
wherein said tether comprises a first end connected to
a fastener attachable to said item; and
wherein said tether is adapted to carry an electrical
signal indicating connection of said fastener to said item.

16. (Once Amended) The device of Claim 3, wherein said
fastener is selected from the group consisting of:
a piece of sticky tape;
an amount of glue;
a rivet;
a staple;
complementary magnetic strips;
complementary hook-and-vane fasteners;
twist tie materials;
a clip; and
a sealable bag.
